Monitoring of a 16-channel PoE switch

Overview

To monitor PoE by using the J-Web interface, select Monitor > Power over Ethernet. The Catalyst Center Power over Ethernet (PoE) enables you to monitor the PoE-capable devices in your network. It also monitors the power summary of switches supplying PoE, which provides information such as a switch's power budget, used power, remaining power, and power usage. It also features a variety of features, including port monitoring, system connection and management services, Virtual Local Area Network (VLAN) configuration. Hikvision, featuring easy management and maintenance. You can easily deploy, monitor and expand your surveillance s stem anytime and anywhere with our software platforms. Enter the following command: 0 405.
