Nordic Fiber Optic Switch Price Inquiry

Overview

Fiber Optic Switches, Multiplexers, DemultiplexersShop DigiKey's large in-stock selection of Fiber Optic Switches, Multiplexers, Demultiplexers. View inven.

Key Takeaways

Fiber optic switches typically range from $200 to over $3,000 depending on speed, ports, and features.

Price Range

The cost of a fiber optic switch varies widely based on specifications and intended use. Small commercial or home-grade switches with a few ports (4–8) and gigabit speeds generally start around $200–$500. Larger enterprise or industrial switches with 24–52 ports, 10G speeds, PoE support, or modular SFP slots can cost $1,000–$3,000 or more.

Managed switches with advanced features like VLANs, redundancy, and monitoring are typically at the higher end of this range.

Factors Affecting Cost

Port Count and Speed: More ports and higher speeds (10G vs 1G) increase the price. Managed vs Unmanaged: Managed switches with configuration options cost more than plug-and-play unmanaged models. Industrial vs Commercial Grade: Industrial switches designed for harsh environments are more expensive due to ruggedized components.

Fiber Type: Single-mode fiber switches are generally pricier than multimode options. Additional Features: PoE support, modular SFP slots, and lifetime warranties can add to the cost.

Buying Options

You can find fiber optic switches on Amazon, Newegg, DigiKey, and Versitron, with options ranging from basic gigabit switches to high-performance 10G industrial models. Prices fluctuate based on availability, vendor, and shipping, so checking multiple sources is recommended.

Summary

For budgeting purposes, expect a Nordic fiber optic switch to cost $200–$3,000, depending on port count, speed, management features, and industrial specifications. For precise pricing, contacting vendors or checking online listings for the specific Nordic model is advised.
