On-site assembly price of distribution box

Overview

Explore distribution box cost factors, safety features, and budget solutions. Learn how to select the right panel for your needs and budget.

Key Takeaways

The on-site assembly price of a distribution box typically ranges from $150 to $1,900, depending on box type, complexity, and labor requirements.

Cost Components

Distribution Box Price The base cost of a distribution box varies widely depending on specifications such as voltage rating, amperage capacity, number of circuits, material, and safety features. Residential units generally cost less, while commercial and industrial boxes with higher durability and advanced features are more expensive. Labor and Assembly Costs On-site assembly includes installation, wiring, and sometimes programming or pre-installation of software.

Labor costs are highly variable, influenced by location, accessibility, and complexity of the installation. For standard residential projects, total costs including parts and labor typically range from $450 to $1,500, while more complex or industrial setups can reach $1,900 or more. Customization and Additional Services Custom assemblies, integration with building management systems, or inclusion of pre-installed electronics can increase costs.

Companies like AVRGT offer full box-build services, including custom cabling, PCB integration, and software programming, which can affect the final price.

Factors Affecting On-Site Assembly Price

Type of Distribution Box: Single-phase vs. three-phase, indoor vs. outdoor, standard vs. smart monitoring features. Number of Circuits and Amperage: Higher capacity boxes require more components and labor. Installation Complexity: Accessibility, mounting requirements, and environmental conditions can increase labor costs.

Regional Labor Rates: Costs vary by region; urban areas or regions with higher labor rates may see higher prices. Additional Features: Weatherproofing, ventilation, or integration with automation systems can add to the cost.

Practical Estimate

For a typical residential distribution box, expect $450–$1,500 including on-site assembly. For commercial or industrial applications, especially with custom electronics or smart features, the total can range from $1,500–$1,900 or more. Contacting specialized assembly providers can provide precise quotes based on your project specifications.
