Outdoor power distribution fiber optic communication box

Overview

This distribution box integrates fiber splicing, splitting, distribution, storage, and cable management within a single, rugged enclosure, providing excellent protection and performance in outdoor environments. Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage. Designed for both wall and pole mounting, it supports up to 24 SC simplex or 48 LC duplex ports, with optional space for PLC splitters and splice trays. Here are some of the key features: A fiber distribution box or outdoor fiber distribution box is an important piece of equipment used in fiber optic networks to terminate and manage. The Outdoor Optical Distribution Box (SP-GTS-B08) is a pre-connectorized FTTH access solution engineered for fast and efficient last-mile fiber deployment. Easily connect your SC or LC adapters.
