# Overhead Cable Trays in Western Europe

## Overview

DKC is a European leader, and offers a comprehensive range of cable tray systems and energy protection, transport and distribution solutions for civil and industrial infrastructures.

## Key Takeaways

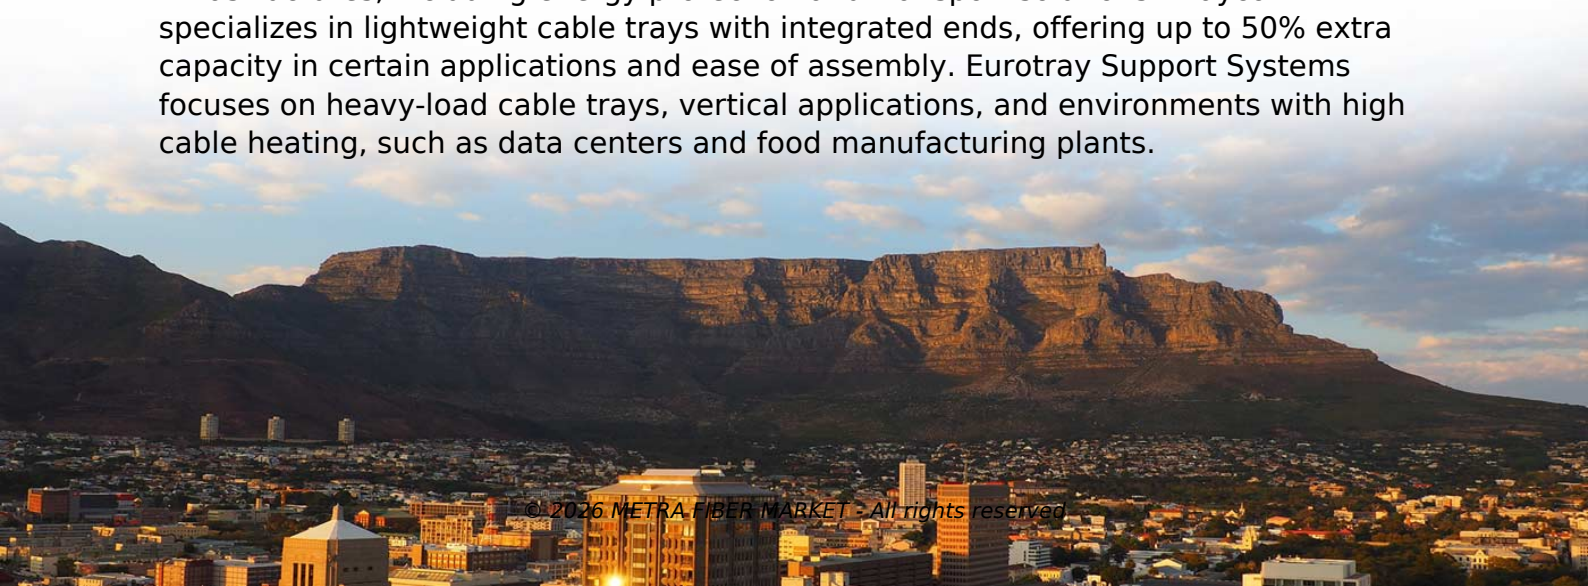

Overhead cable trays in Western Europe are widely available from specialized manufacturers offering durable, flexible, and standards-compliant solutions for industrial and commercial applications.

### Key Manufacturers and Suppliers

Eurostrut provides hot-dip galvanized or stainless steel cable trays suitable for indoor and outdoor use, with open or perforated designs to reduce overheating and allow easy maintenance. Their systems include distribution trays, cable routes, and NATO-type models.

DK

C Europe offers a comprehensive range of cable tray systems for civil and industrial infrastructures, including energy protection and transport solutions. Trayco specializes in lightweight cable trays with integrated ends, offering up to 50% extra capacity in certain applications and ease of assembly. Eurotray Support Systems focuses on heavy-load cable trays, vertical applications, and environments with high cable heating, such as data centers and food manufacturing plants.

Spina Group (Schiavetti Tekno) manufactures stainless steel, galvanized, and wire-mesh trays, including ladder, perforated, and closed-bottom types, with compliance to European (EN) and international standards.

### Types of Overhead Cable Trays

Ladder trays: Provide strong support for heavy cables and allow good ventilation. Perforated trays: Reduce overheating and allow easy cable inspection. Wire-mesh trays: Lightweight, flexible, and suitable for complex routing.

Closed-bottom trays: Protect cables in environments requiring insulation or contamination control. Materials and DurabilityHot-dip galvanized steel: Corrosion-resistant, suitable for indoor and outdoor use. Stainless steel: Ideal for harsh or marine environments.

Aluminum: Lightweight and corrosion-resistant for specific industrial applications.

### Installation and Features

Overhead trays are designed for fast and flexible installation, with modular components, integrated ends, and suspension systems. Systems often include joints, grounding holes, and copper bonding jumpers to ensure electrical continuity and accommodate thermal expansion. Custom sizes and turnkey solutions are available to meet project-specific requirements, including raised floor or vertical applications.

### Applications

Industrial plants, energy and infrastructure projects, and data centers. Environments with high cable density or heat generation. Marine and outdoor installations requiring corrosion-resistant materials.

In Western Europe, these cable tray systems are widely used due to their durability, compliance with EN standards, and adaptability to complex industrial and commercial installations. Manufacturers provide technical support, design assistance, and after-sales service to ensure safe and efficient cable management.
