Key Takeaways

Anti-corrosion cable trays in Panama typically range from \$15 to \$120 per meter, depending on material, size, and surface treatment.

Material and Surface Treatment Impact

The price of cable trays varies significantly based on the material and anti-corrosion treatment: Stainless Steel (SS304, SS316, SS316L): Offers excellent corrosion resistance, suitable for harsh environments. Prices generally range from \$50 to \$120 per meter, depending on thickness and tray type (solid, perforated, or ladder).

Hot-

Dip Galvanized Steel: Provides durable corrosion protection for outdoor or industrial use. Typical prices are \$25 to \$60 per meter, influenced by tray width, height, and galvanization thickness.

Powder-

Coated Steel: Suitable for indoor applications, with moderate corrosion resistance. Prices usually fall between \$15 and \$40 per meter. Fiberglass Reinforced Plastic (FRP/GRP) or Aluminum Alloy: Lightweight and corrosion-resistant, often used in chemical or coastal environments.

Prices can range from \$40 to \$100 per meter depending on specifications.

Tray Types and Dimensions

Ladder Tray: Common for heavy-duty industrial installations; supports large cable bundles. Price increases with width and side rail height. **Perforated Tray:** Allows ventilation and heat dissipation; moderately priced compared to ladder trays.

Solid Trough Tray: Fully enclosed, protecting cables from dust and moisture; typically at the higher end of the price range.

Purchasing Guidance

Suppliers in Panama, such as Brilltech Engineers and Jeetmull Jaichandlall, provide customized quotes based on project requirements, including tray length, width, and material. For large projects, bulk orders may reduce the per-meter cost. Always confirm surface treatment standards (e.g., BS EN 1461 for galvanization) to ensure long-term corrosion resistance.

In summary, expect to pay \$15-\$120 per meter for anti-corrosion cable trays in Panama, with stainless steel and specialized FRP trays at the higher end, and powder-coated or standard galvanized steel at the lower end. Contacting local suppliers for a custom quote is recommended to get precise pricing for your project.
