Pno optical power meter

Overview

With this power meter, the signal strength on optical fibres in PON networks can be measured in a simple way. This makes it possible to quickly find overloads and defective cables. The device is very handy and as it works with battery operation it can easily be used anywhere. The power meter. Detect multiple wavelengths automatically - NO setup required! AFL is a trusted supplier of optical testing equipment with more than 30 years of experience and tens of thousands of units in the field. traceable power meters are used for testing single-mode and/or. Whether a DWDM, PON or CWDM network, optical power meters from Challenger Optics will allow technicians to quickly identify and resolve any issues. - Next generation PON Power Meter, XGS-PON, E-PON and RFoG.
