

Price List and Prices for Mesh Cable Trays

Overview

Cable Tray Price List 2025: Current Market Rates Find the latest cable tray price list for 2025. Compare B2B and B2C pricing, materials, and supplier optio.

Key Takeaways

Wire mesh cable trays typically range from \$10 to \$50 per meter depending on material, size, and finish, with stainless steel and electro-galvanized options being the most common.

Pricing Overview

Wire mesh cable trays, also known as basket trays, are among the most affordable cable management solutions due to their lightweight construction and ease of installation. Prices vary based on material, dimensions, and coating: Electro-galvanized steel trays: Generally cost less than stainless steel, offering good corrosion resistance and durability. Stainless steel trays (SS304 / SS316): Higher-priced due to superior corrosion resistance and long-term durability, suitable for industrial or outdoor environments.

Aluminum trays: Lightweight and easier to handle, sometimes slightly more expensive than steel per unit length but cheaper in shipping and installation. On platforms like Alibaba, custom-sized 304 stainless steel wire mesh trays are available with prices starting around \$10-\$20 per meter for standard sizes, with larger or heavy-duty trays costing up to \$50 per meter. Bulk orders and CE-certified trays may include additional benefits such as free samples and extended warranties.

Factors Affecting Cost

Material and Finish: Stainless steel is more expensive than electro-galvanized steel; hot-dip galvanized or coated trays may also increase cost. **Tray Dimensions:** Width, height, and mesh size influence the price; larger trays require more material.

Installation Complexity: Wire mesh trays are easier to install than conduit or solid-bottom trays, reducing labor costs and overall project expenses.

Project Scale: Large-scale installations benefit from bulk purchasing, which can reduce per-meter cost. **Accessories:** Brackets, clamps, covers, and suspension systems add to the total cost but are essential for proper installation.

Cost Comparison

Compared to other cable management systems, wire mesh trays are cost-effective:

Conduit systems: More expensive due to labor-intensive installation and bending requirements.

Ladder trays: Slightly higher cost than mesh trays but suitable for heavy-duty power cables.

Wire mesh trays: Lightweight, easy to cut and route, ideal for data centers and office cabling, saving 40-60% of total project costs compared to conduit.

Conclusion

For most commercial and industrial applications, wire mesh cable trays offer a balance of affordability, flexibility, and durability. Prices typically range from \$10 to \$50 per meter, with stainless steel and electro-galvanized options being the most common. Choosing the right material, size, and accessories can optimize both performance and cost efficiency.
