Price List and Prices of Digital Optical Film Transmitters

Overview

optical transmitter price: Best Deals in 2025 Find the best optical transmitter price for 2025. Compare top suppliers, check specs, and get factory-direct.

Key Takeaways

Digital optical transmitters typically range from $9 per unit for bulk SFP+ models to over $200 per unit for specialized long-distance or high-power units. Digital optical transmitters convert electrical signals into optical signals for fiber-optic transmission, and their prices vary based on output power, wavelength, form factor, and application. For example, budget SFP+ transmitters offering 10Gbps throughput can cost around $9 per piece in orders of 1000+ units, while high-power 15 dBm transmitters may cost $20 per unit for single-piece purchases.

CATV or FTT

H systems often see prices between $140–$160 per unit for bulk orders of 1000 units. Factors affecting price include: Transmission distance and power: Longer-range or higher-output transmitters cost more. Wavelength compatibility: 1310nm for access networks, 1550nm for long-haul applications.

Form factor: SFP, XFP, QSFP, or modular designs influence cost and integration ease. Volume discounts: Bulk orders significantly reduce per-unit cost. Supplier and region: Manufacturing in China often lowers base prices, but tariffs and logistics can add 12–18% in Western markets.

For digital optical film transmitters, factory-direct or wholesale options on platforms like Alibaba or Made-in-China allow customization and competitive pricing, especially for OEM or large-scale deployments. High-end transmitters with advanced features like Digital Diagnostics Monitoring (DDM) or coherent modulation for 400G+ data rates are priced higher due to performance and reliability requirements. In summary, prices range from under $10 for basic bulk units to over $200 for specialized high-performance digital optical transmitters, with bulk purchasing and supplier selection being key to cost optimization.
