Price List for Communication Tower Foundations

Overview

Basic: Small monopole, single antenna, moderate site — Tower $15,000; Foundation $8,000; Installation $12,000; Permits $2,000; Total $37,000–$45,000; per-unit notes: $/ft and $/lb apply to materials. Towers are not rooted by only pouring concrete—they require extensive soil analysis, wind loads, types of towers, and seismic activity to determine the necessary. Buyers typically pay a combination of tower price, installation, and permitting costs, with large variations by height, type, and location. Cost estimates below reflect common U. pricing. The cost to build a tower varies widely based on height, material, location, and use. Typical factors driving price include height, foundation needs, height-to-base ratio, wind and seismic design, and local permitting requirements.
