

Price list of explosion-proof logging fiber optic cables

Overview

Our top choices include high-speed data transfer cables and durable charging solutions tailored for bulk needs. Contact us for customized options that meet your specific requirements.

Key Takeaways

Explosion-proof or armored fiber optic cables typically cost between \$0.30 and \$1.50 per meter, depending on specifications and environmental ratings.

Price Range

Armored Cable (Steel Tape / FRP): \$0.30 – \$1.00 per meter
Aerial / Self-Supporting Cable: \$0.

40 – \$1.50 per meter
Outdoor Single-mode or Multimode Cables: \$0.10 – \$0.

60 per meter
These prices are indicative and reflect standard configurations; custom-built or certified explosion-proof cables may cost more due to additional testing and compliance requirements.

Factors Affecting Cost

Fiber Count: Higher strand counts (e.g., 24-core, 96-core) increase material and production costs compared to 2-core or 4-core cables. **Cable Construction:** Armored cables with steel tape or FRP provide protection in hazardous areas but add 20–50% to the base cost. **Jacket Material and Environmental Rating:** Cables with PE, UV-resistant, flame-retardant, or direct-burial ratings are more expensive than standard indoor PVC or LSZH jackets.

Compliance and Certification: Explosion-proof or hazardous-area-rated cables must meet ATEX, IECEx, or NEC standards, which can increase manufacturing and testing costs. **Installation Considerations:** Costs may rise if the cable is installed underground, in conduits, or in regulated industrial environments due to additional labor, handling, and protective measures.

Practical Considerations

Bulk Purchases: Buying in bulk can reduce the per-meter cost. **Total Landed Cost:** Include shipping, import duties, and local handling when budgeting for international purchases. **Project Environment:** Harsh or explosive environments require explosion-proof enclosures and armored routing, which may increase overall project costs beyond the cable itself.

In summary, for explosion-proof or armored fiber optic cable, expect a base material cost of \$0.30–\$1.50 per meter, with final project costs influenced by fiber count, construction, environmental rating, and compliance requirements.
