# Price of 48-core optical fiber cable gyts

## Overview

GYTS Armored Fiber Optic Cable | Wholesale DuctSource GYTS armored fiber optic cable direct from our factory. With steel tape GYTS 48 Cores Stranded Steel.

## Key Takeaways

A 48-core optical fiber cable typically costs between $0. 50 and $3. 00 per foot, depending on fiber type, construction, and environmental rating.

### Cost Factors

Fiber Type: Single-mode (OS2) cables are generally less expensive per foot than multimode (OM3/OM4) cables, with single-mode costing around $0. 10–$0. 50 per foot and multimode ranging from $0.

30–$1. 00 per foot for standard counts. Higher-quality glass or premium brands can increase the price further.

Cable Construction: The type of cable—loose tube, tight-buffered, armored, or non-armored—affects cost. Armored cables for outdoor or direct-burial applications can add 20–50% to the base price. Indoor cables with PVC or LSZH jackets are cheaper, while outdoor PE or UV-resistant jackets increase costs.

Fiber Count: A 48-core cable is mid-range in terms of strand count. Pricing scales with the number of fibers; for example, a 24-core cable may cost around $1 per foot, while a 96-core cable can reach $3–$6 per foot. Volume and Lead Time: Bulk purchases reduce per-unit cost, while custom or small orders may be more expensive.

Installation Considerations: If including installation, costs rise significantly. Underground trenching can add $20–$50 per foot, aerial installation $8–$12 per foot, and labor for splicing and termination ranges from $50–$150 per hour.

### Estimated Pricing

For a 48-core optical fiber cable: Material only (per foot): $0. 50–$3. 00 depending on fiber type, jacket, and armor.

Material only (per meter): Approximately $1. 60–$9. 80 per meter.

Installed cost (per foot): $2–$9 including labor, trenching, and termination for typical commercial projects.

### Summary

The final cost of a 48-core optical fiber cable depends on fiber type, cable construction, environmental rating, and installation method. For budgeting purposes, expect $0. 50–$3.

00 per foot for the cable itself, with additional costs for installation, connectors, and any protective measures. Bulk orders and standard specifications can reduce costs, while custom or armored cables for harsh environments will be at the higher end of the range.
