Price of Curved Horizontal Elbows for Cable Trays

Overview

Cable Tray Cable Tray Fitting, 90° Junction Kit. Material: Carbon Steel. Finish: Electroplated Zinc. Includes: (1) Hardware for (1) Tee (2) 90° Bends. Clea.

Key Takeaways

Curved horizontal elbows for cable trays typically range from around $9. 85 per unit, with prices varying based on material, size, and supplier.

Pricing Overview

Stainless Steel and Aluminum Elbows: Average price is approximately $9. 85 per unit, with bulk purchase options starting from 5 units, and customizable options available for industrial applications.

Hot-

Dip Galvanized 90° Elbows: Prices vary depending on specifications and cable tray width, with high-quality galvanized elbows offering excellent corrosion resistance and durability for industrial and commercial installations.

Pre-

Galvanized Steel Elbows: Available in various sizes, such as 2. 0mm thickness, 60mm height, and 900mm width, suitable for telecommunications and small-gauge power cable installations. Pricing is competitive and depends on the size and quantity ordered.

Factors Affecting Price

Material: Stainless steel and aluminum elbows are generally more expensive than galvanized steel due to corrosion resistance and durability. Size and Dimensions: Larger elbows or those designed for wider cable trays cost more. Quantity: Bulk orders often reduce the per-unit cost.

Supplier and Manufacturing Process: Hot-dip galvanizing or powder coating can increase the price due to added protection and longevity.

Additional Considerations

Ensure compatibility with your cable tray system (e.g., ladder, perforated, or solid bottom trays). Check for certifications or standards compliance, such as NEMA classes, to match your installation requirements. Customizable elbows may incur additional costs but provide better fit and cable protection.

Overall, for standard curved horizontal elbows, expect prices starting around $9–$10 per unit, with variations based on material, size, and supplier options.
