Overview

Junction Box Cost Guide: Prices & Installation 2026A junction box can cost anywhere from around $10 for a simple indoor plastic box to several hundred doll.

Key Takeaways

The total cost of a junction box after installation typically ranges from $110 to $750, depending on the box type, material, size, and installation complexity.

Junction Box Costs

The price of a junction box itself varies widely based on material and type. Plastic indoor boxes are the most affordable, ranging from $10 to $60, while metal boxes cost more due to durability, typically $50 to $200. Weatherproof or outdoor boxes can range from $70 to $450 because they are designed to withstand rain, dust, and UV exposure.

Larger boxes or specialized enclosures for heavy-duty wiring may cost even more.

Installation Costs

Labor for installing a junction box generally adds $100 to $300 per box, depending on factors such as accessibility, mounting location, and whether the installation is indoor or outdoor. Outdoor installations or boxes in tight spaces like attics or under floors can increase labor costs. Installing multiple boxes at once may reduce the per-box labor cost.

Total Estimated Cost

Combining hardware and labor, the total cost for a single junction box installation can be estimated as follows: Basic indoor plastic box: $110–$160Standard metal box: $150–$500Weatherproof outdoor box: $170–$750 These estimates assume a typical residential or commercial setup and may vary based on local labor rates, electrical code requirements, and the complexity of wiring connections.

Additional Considerations

Box size and capacity: Larger boxes for more wires or higher gauge cables cost more. Material choice: Metal boxes are more durable and required for conduit systems, while plastic is suitable for simple indoor wiring. Accessibility and location: Hard-to-reach areas increase labor costs.

Compliance: All junction boxes must remain accessible for inspection and maintenance according to electrical codes. By considering these factors, you can budget accurately for the installation of a junction box after a distribution box setup.
