Price of Explosion-proof Cantilever Distribution Box

Overview

Explosion-proof distribution boxes are significantly more expensive than standard ones, usually priced based on wiring diagrams.

Key Takeaways

Explosion-proof cantilever distribution boxes typically range from $500 to over $3,000 depending on specifications, materials, and certifications.

Price Overview

The cost of an explosion-proof distribution box varies widely based on factors such as material (e.g., 316 stainless steel), IP rating, built-in components, and certifications like ATEX or IECEx. For example: Standard industrial models for lighting or power distribution in hazardous areas can start around $500–$800 for smaller, simpler units. High-end or customized units, such as those made from 316 stainless steel with specialized hinges and multiple built-in components, can exceed $2,000–$3,000.

Bulk orders or IP66/IP65-rated waterproof models may have negotiable pricing depending on quantity and supplier.

Factors Affecting Price

Material and Construction: Stainless steel enclosures and flameproof joints increase durability and cost. Certifications: ATEX, IECEx, and other explosion-proof certifications are essential for compliance in hazardous zones and can raise the price. Size and Capacity: Larger boxes with more circuits or higher amperage ratings cost more.

Customization: Options like cantilever mounting, specialized hinges, or integrated components add to the price. Supplier and Region: Prices vary between suppliers, with international shipping or import duties potentially increasing costs.

Purchasing Tips

Compare suppliers: Check platforms like Alibaba for bulk pricing and eBay for individual units. Verify certifications: Ensure the box meets Zone 1 or Zone 2 hazardous area standards. Request quotes for custom configurations: Many suppliers offer tailored solutions to meet specific industrial requirements.

By considering these factors, you can select a cost-effective explosion-proof cantilever distribution box that meets safety and operational needs.
