Price of Indoor Fiber Optic Cable Splice Boxes

Overview

Amazon.com: Fiber Splice EnclosurePrice and other details may vary based on product size and color. Fiber Optic Wall Mount Box with LC Couplers for Single.

Key Takeaways

Indoor fiber optic splice boxes typically range from $20 to $150 depending on capacity, features, and brand. Indoor fiber optic splice boxes, also known as fiber optic wall-mount enclosures, are designed to protect fiber splices, manage cables, and maintain signal integrity in network rooms or IDF closets. Prices vary based on fiber capacity, number of ports, and included accessories.

For example, a 6-port SC fiber enclosure with pre-installed pigtails and color-coded strands can cost around $25–$40 on Amazon. Larger enclosures, such as a 12-port distribution box suitable for FTTH or P2P networks, typically range from $50–$100 depending on material quality and IP rating.

Factors Affecting Price

Fiber Capacity: Boxes supporting 1–12 fibers are generally less expensive, while high-density enclosures for 24–144 fibers cost more. Material and Durability: Engineering plastics with UV, impact, and water resistance increase cost, especially for IP65-rated enclosures suitable for both indoor and outdoor use. Included Accessories: Some kits include splice trays, pigtails, couplers, and mounting hardware, which can raise the price but simplify installation.

Mounting Options: Wall-mounted boxes are usually cheaper than larger rack-mounted or customizable enclosures.

Typical Price Ranges

Small indoor splice boxes (6–12 fibers): $20–$50Medium enclosures (12–24 fibers): $50–$100High-capacity or customizable boxes (24–144 fibers): $100–$150+ For quick purchase, online retailers like Amazon and specialized suppliers such as Lanshack or ShopFiber24 offer a variety of indoor splice boxes with immediate shipping options. Choosing the right box depends on your network size, fiber type (single-mode or multimode), and installation environment, ensuring both protection and efficient fiber management.
