Price of a breathable electrical distribution box cover

Overview

The housing of the fuse box cover is breathable and moisture resistant and ensures safe signal transmission.

Key Takeaways

Breathable or hollow-design electrical distribution box covers typically range from $20 to $60 depending on size, material, and features. Breathable distribution box covers are designed with hollow or perforated structures to allow heat dissipation, prevent overheating, and avoid interference with Wi-Fi signals while maintaining safety and aesthetics. They are commonly made from plastic (PVC or polycarbonate) for lightweight and cost-effective options, or metal (steel or aluminum) for durability and impact resistance.

Polycarbonate covers are more heat-resistant, while PVC covers are cheaper and easier to install. Price factors include: Material: Plastic covers are generally $20–$40, while metal or powder-coated covers can cost $40–$60 or more. Size and capacity: Larger covers for commercial panels or multiple circuits are more expensive.

Design features: Flip-top, transparent, or decorative finishes may increase the price.

P rating: Covers rated IP65–IP67 for dust and water resistance are typically at the higher end of the price range. Where to buy: Amazon offers a variety of hollow or breathable covers, often priced around $25–$50 depending on size and style. Alibaba provides bulk or industrial options, with prices varying based on material and customization.

Local hardware stores like B&Q or Grainger may carry standard or ventilated covers, with prices similar to online retail. In summary, for a residential or small commercial application, expect to pay $20–$60 for a breathable electrical distribution box cover, with higher prices for larger, metal, or IP-rated models.
