Price of a single bend in a cable tray

Overview

Shop for Cable Tray - Bends at Platt CleanTray 45-Degree Elbows for 45-degree turns in applications that require frequent washdown.

Key Takeaways

The cost of a single cable tray bend typically ranges from $20 to $150 or more, depending on material, angle, width, and duty rating.

Factors Affecting Price

Material: Bends can be made from mild steel (pre-galvanized or hot-dip galvanized) or stainless steel (316L). Stainless steel bends are generally more expensive due to corrosion resistance and durability. Angle and Type: Common angles include 45° and 90°, with adjustable bends available for 30°–90° configurations.

More complex or adjustable bends cost more than standard fixed-angle bends. Tray Width and Duty Rating: Wider trays (up to 900mm) and heavy-duty bends are more expensive than narrow or light-duty bends. Finish: Pre-galvanized (PG) bends are cheaper than hot-dip galvanized (HDG) or stainless steel (SS) finishes.

Typical Price RangesLight-duty, small width (50–150mm), pre-galvanized: $20–$40 per bend. Medium-duty, moderate width (150–300mm), hot-dip galvanized: $50–$100 per bend. Heavy-duty, wide trays (300–900mm), stainless steel: $100–$150+ per bend.

Additional Considerations

Quantity Discounts: Buying in bulk or from modular systems can reduce per-unit cost. Installation Costs: Labor for installing bends may add to the total project cost, though cable trays are generally faster to install than conduit systems. Supplier Variations: Prices vary by manufacturer and region; contacting local suppliers or distributors is recommended for precise quotes.

In summary, a single cable tray bend can cost anywhere from $20 to over $150, with the final price influenced by material, angle, width, duty rating, and finish. For accurate budgeting, it is best to specify the exact bend type and request quotes from suppliers.
