Price of cable trays at the top of storefront

Overview

Cable Tray Price List 2025: Current Market Rates Find the latest cable tray price list for 2025. Compare B2B and B2C pricing, materials, and supplier optio.

Key Takeaways

Cable trays for commercial installations typically cost between $2 and $50 per meter, depending on material, type, and finish.

Typical Price Ranges

Galvanized Steel Cable Trays: $2 – $10 per meter for standard indoor use; pre-galvanized steel is the most affordable option for dry areas, while hot-dip galvanized (HDG) is more expensive for outdoor or wet environments. Aluminum Cable Trays: $8 – $20 per meter; lightweight, rust-resistant, and easier to install, often preferred for overhead or long-span installations. Stainless Steel Cable Trays: $15 – $40 per meter; ideal for high-humidity, chemical, or food-service environments due to corrosion resistance.

Plastic (FRP or PVC) Trays: $8 – $25 per meter; budget-friendly and non-conductive, suitable for light loads and indoor applications.

Cost Considerations

Tray Type: Ladder trays are heavier-duty and cost more ($15–$50/m), while wire mesh or perforated trays are cheaper ($8–$30/m) and suitable for data or light cabling. Supports and Brackets: Installation hardware can add 20–30% to the total cost, as trays must be securely mounted to walls, ceilings, or floors. Fittings and Covers: Bends, tees, and protective covers increase costs, especially for outdoor or high-traffic areas.

Labor and Installation: Labor costs vary by region; North America tends to have higher labor rates, making fast-install systems like snap-together or aluminum trays more cost-effective. Bulk Orders: Ordering in larger quantities can reduce per-meter costs by 20–40%.

Example Installed Costs

Wire Mesh Tray: $8–$30 per meter, low labor, ideal for IT or light cabling. Ladder Tray: $15–$50 per meter, moderate labor, supports heavy power cables.

Aluminum I-

Tray: $224–$260 per straight section (approx. 3 meters), suitable for industrial or long-span installations.

Tips for Storefront Installations

For light commercial cabling, wire mesh or perforated trays are cost-effective and easy to install. For heavier power or security cabling, ladder trays or aluminum trays provide better support and durability. Consider pre-galvanized steel for indoor storefronts to balance cost and corrosion resistance.

Plan for accessories and fittings in your budget, as these can significantly impact the total installed cost. By selecting the right material, tray type, and ordering in bulk, storefront projects can optimize both cost and installation efficiency while ensuring long-term durability.
