Price of column-mounted distribution boxes

Overview

Depending on your community''s size or the number of mailboxes you need, our CBU''s and parcel lockers range from 2 to 16 door units.

Key Takeaways

The price of a complete set of column-mounted distribution boxes typically ranges from $200 to over $2,000 per unit, depending on material, capacity, and included components.

Pricing Overview

The cost of a distribution box depends on several factors, including material construction (plastic, powder-coated steel, or stainless steel), number of circuits, voltage and amperage ratings, and whether the box comes pre-fitted with circuit breakers, surge protectors, and busbars. Basic residential units with single-phase configurations can start around $200–$400, while industrial-grade, three-phase, or weatherproof outdoor units can exceed $2,000.

Material and Features Impact

Plastic enclosures: Lightweight, cost-effective, suitable for indoor use; prices are on the lower end. Metal enclosures (steel or stainless steel): More durable, corrosion-resistant, ideal for industrial or outdoor applications; prices are higher. IP-rated boxes (e.g., IP65): Weatherproof and dustproof, often required for outdoor installations, adding to the cost.

Summary

For budgeting purposes, expect residential or small commercial sets to cost $200–$800, while industrial or high-capacity column-mounted sets can range from $1,000 to $2,500 or more, depending on features, materials, and included components. Always consider installation, maintenance, and long-term operational costs when planning your purchase.
