Price of fire-resistant cable trays in Albania

Overview

albanian-fireproof-cable-tray-distributor Manufacturer/Producer22 suppliers for albanian-fireproof-cable-tray-distributor Manufacturer/Producer Find wholes.

Key Takeaways

Fireproof and corrosion-resistant cable trays in Albania typically range from €25 to €150 per meter, depending on material, fire rating, and supplier. Material and Fire Rating Impact on PriceStainless Steel Trays: Offer excellent corrosion resistance and fireproofing, suitable for industrial and coastal environments. Prices generally range from €80 to €150 per meter for high-grade stainless steel with UL or IEC fire ratings.

Aluminum Trays: Lightweight and corrosion-resistant, often used in commercial buildings. Prices are typically €50 to €100 per meter depending on thickness and fireproof coatings.

FR

P (Fiber Reinforced Polymer) Trays: Highly resistant to both fire and corrosion, ideal for chemical plants or outdoor installations. Costs range from €60 to €120 per meter. Galvanized Steel Trays with Fire-Resistant Coatings: More economical, with prices around €25 to €70 per meter, suitable for general industrial use.

Factors Affecting Cost

Fire Rating: Trays certified for 2-hour or 4-hour fire resistance are more expensive due to specialized coatings or composite materials. Corrosion Resistance: Environments with high humidity, salt, or chemicals require stainless steel or FRP, increasing cost. Tray Type: Ladder, perforated, or U-shaped trays differ in material usage and manufacturing complexity, affecting price.

Supplier and Shipping: Importing from Europe or Asia may add shipping and customs costs; local distributors in Albania may offer competitive pricing but limited stock.

Sourcing in Albania

Local Distributors: Contact Albanian electrical supply companies or construction material suppliers for quotes. International Suppliers: Platforms like Alibaba, Accio, and Ekabel24 offer fireproof and corrosion-resistant trays with shipping options to Albania. Customization: Many suppliers provide trays with specific fire ratings, coatings, or dimensions, which can influence final pricing.

Recommendation

For industrial or high-safety projects, prioritize stainless steel or FRP trays with certified fire ratings. For general commercial use, galvanized steel with fire-resistant coatings may be sufficient and more cost-effective. Always verify compliance with IEC, UL, or local fire codes to ensure safety and regulatory adherence.

By considering material, fire rating, and supplier options, you can estimate a budget range of €25–€150 per meter for fireproof and corrosion-resistant cable trays in Albania.
