Price of flame-retardant reinforced cable trays in Portugal

Overview

How much does flame-retardant cable tray cost in PortugalHow much does flame-retardant tray cost in Portugal cable per meter, including materials, demand.

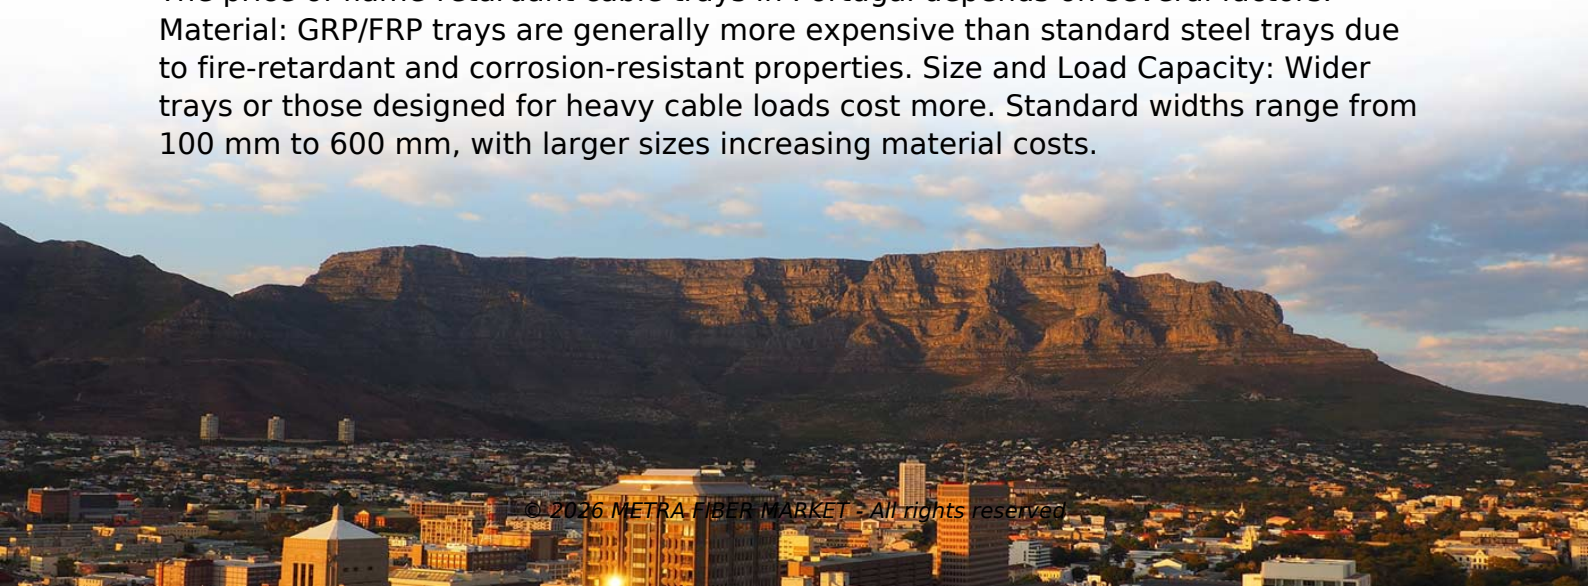

Key Takeaways

Flame-retardant cable trays in Portugal typically range from €50 to €200 per meter depending on material, size, and fire-resistance specifications. Material and Type ConsiderationsFlame-retardant cable trays are commonly made from GRP (Glass Reinforced Polymer) or FRP (Fibre Reinforced Polymer), which are lightweight, corrosion-resistant, and self-extinguishing. These trays are halogen-free and meet fire safety standards such as ASTM E84 Class-1 and UL 94 V0, making them suitable for industrial, commercial, and outdoor installations.

Compared to steel trays, GRP/FRP trays are lighter (up to 70% less mass), reducing installation labor and structural support costs.

Cost Factors

The price of flame-retardant cable trays in Portugal depends on several factors: Material: GRP/FRP trays are generally more expensive than standard steel trays due to fire-retardant and corrosion-resistant properties. Size and Load Capacity: Wider trays or those designed for heavy cable loads cost more. Standard widths range from 100 mm to 600 mm, with larger sizes increasing material costs.

Environmental Resistance: Trays designed for outdoor, marine, or chemical-exposed environments may include UV and chemical-resistant coatings, adding to the cost. Accessories and Installation: Supports, joints, connectors, and specialized mounting hardware can increase overall project costs. Certifications: Compliance with IEC 61537, NEMA FG-1, or DEKRA certifications may slightly increase the price but ensures safety and regulatory compliance.

Supplier Options in Portugal

Several suppliers provide flame-retardant cable trays in Portugal: GroupSumi: Offers a wide range of indoor and outdoor cable trays with durable, fire-resistant materials and accessories for complete installations. Jeetmull Jaichandlall (P) Ltd.: Provides custom-sized cable trays with high-quality finishing and compliance with industry standards.

EA

E Electric: Specializes in GRP cable trays with high chemical, UV, and fire resistance, suitable for industrial and marine environments.

Typical Price Range

Based on material and specifications, GRP/FRP flame-retardant cable trays in Portugal generally cost between €50 and €200 per meter. Smaller, standard trays for light-duty indoor use are at the lower end, while large, heavy-duty, or highly specialized trays for industrial or outdoor applications are at the higher end. Installation and accessories may add 20–40% to the total project cost.

Recommendations

Request quotes from multiple suppliers to compare prices and certifications. Consider total lifecycle cost, including maintenance savings from corrosion resistance and fire safety benefits. Ensure the trays meet local fire safety regulations and project-specific load requirements.

By evaluating material, size, environmental resistance, and supplier options, you can select flame-retardant cable trays in Portugal that balance cost, safety, and durability.

How much does flame-retardant cable tray cost in Portugal

How much does flame-retardant tray cost in Portugal cable per meter, including materials, demand, and Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric

Fire protection for cables & cable trays | Flamro

Our fire protection solutions for cables are suitable for both indoor and outdoor use. They are used in (nuclear) power plants, substations, production facilities,

GRP Cable Tray & Cable Ladders | EAE Electric

GRP cable trays are highly resistant to acids, bases, and many other chemical substances. This makes them ideal for use in chemical plants and heavy industrial areas where chemical resistance is essential.

Fiberglass Reinforced Plastic (FRP) Cable Tray

Fire retardant quality is available with compliance to ASTM-E84 and BS 476 standards. The information given below is a guide to the typical properties of Pultruded Fiberglass Reinforced plastic.

FRP Flame Retardant Tray: Durable & Customizable

Find reliable FRP flame retardant trays with UV resistance, anti-static coating, and customizable sizes. Click to explore top-rated suppliers and get competitive pricing for industrial use.

Fire resistant cable tray | Hermi-solutions

Cable trays are intended for the construction of fire-resistant cable paths with surface cable laying. Cable paths are constructed as standard or lightweight
