

Price of optical cable opening pulley

Overview

The choice of material significantly influences the performance, longevity, and cost-effectiveness of optical cable pulleys, allowing manufacturers to tailor them to specific operational demands.

Key Takeaways

Optical cable opening pulleys typically range from \$50 to \$500 depending on size, weight capacity, and material.

Price Overview

The cost of an optical cable opening pulley varies based on specifications such as working load limit (WLL), diameter, and material. For example, pulleys with a WLL of 250 kg up to 5,000 kg and diameters from 80 mm to 250 mm are available, with higher capacity units generally costing more. Lightweight or small pulleys for low-voltage or network cables are usually priced at the lower end of the range, around \$50-\$150, while heavy-duty industrial pulleys can reach \$400-\$500 or more.

Where to Buy

Bay offers a variety of fiber cable lifting pulleys with competitive prices and free shipping on many items. Amazon sells cable pulleys suitable for low-voltage, network, and coaxial cables, often in packs, with prices depending on size and brand. Specialized manufacturers like those listed on Made-in-China provide heavy-duty fiber optic cable laying pulleys, with options for customization and bulk orders, typically requiring direct inquiry for exact pricing.

Levagemanutention.com offers EU-standard steel sheave pulleys with WLL from 250 to 5,000 kg, where prices are available upon request from customer service.

Factors Affecting Price

Material: Steel or aluminum pulleys with ball bearings are more expensive than plastic or nylon models. **Load Capacity:** Higher WLL increases cost. **Size and Diameter:** Larger sheaves for thicker cables cost more.

Customization: Special sizes or coatings (zinc-plated, chromated) may add to the price. **Quantity:** Bulk orders often reduce per-unit cost. For the most accurate pricing, it is recommended to contact suppliers directly with your required specifications, as prices fluctuate based on material, size, and shipping location.
