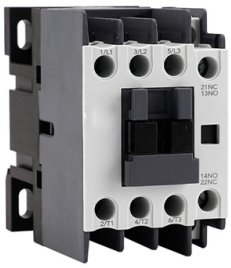
Price per unit of fiberglass cable trays



Overview

Fiberglass Cable Tray Systems The average price of the fiberglass cable tray system is US$142 per unit, and the annual output is approximately 9183000 unit.

Key Takeaways

The average price of a fiberglass cable tray unit is approximately $142, with per-meter costs ranging from $10 to $50 depending on specifications.

Overview of Pricing

Fiberglass cable trays, made from fiberglass reinforced plastic (FRP), are valued for their lightweight, corrosion resistance, and electrical insulation properties. The average unit price is around $142 per system, reflecting standard industrial and commercial specifications (QY Research 2026). For per-meter pricing, FRP trays typically range from $10 to $50 per meter, influenced by tray size, design (ladder or solid bottom), and environmental factors (GangLong Fiberglass).

Factors Affecting Price

Material Type: FRP trays are more expensive than standard steel or aluminum trays but offer superior corrosion resistance and durability in aggressive environments. Tray Design: Ladder-type trays are generally more economical for large-scale installations, while solid-bottom or trough-type trays are used for high-protection scenarios, increasing cost. Size and Load Capacity: Wider or thicker trays designed to carry heavier cables cost more due to higher material usage.

Environmental Conditions: Trays for outdoor, chemical, or high-humidity environments may require specialized resins (vinyl ester or polyester), which affects pricing. Bulk Orders: Purchasing in large quantities can reduce per-unit costs significantly, sometimes by 20–40% depending on supplier and order volume. Customization: Custom lengths, colors, or pre-drilled configurations can increase the price per unit.

Market Considerations

The global market for fiberglass cable trays is growing, driven by industrial expansion, data center development, and green energy projects. Prices vary by region, supplier, and technological features, with North America, Asia Pacific, and Europe being the dominant markets.

B2

B platforms like Alibaba offer competitive bulk pricing, sometimes as low as $0. 80 to $76 per unit, depending on specifications and order size.

Practical Advice

For industrial or commercial projects, expect $142 per standard unit or $10–50 per meter for FRP trays. For large-scale procurement, request bulk quotes to reduce costs. Consider environmental exposure and load requirements when selecting resin type and tray design to ensure long-term durability and cost-effectiveness.

By understanding these factors, buyers can make informed decisions and optimize both performance and budget when sourcing fiberglass cable trays.
