Price quote for 100mm low-voltage cable trays

Overview

Cable Tray 100mm Discover 100mm cable trays with perforated design for superior cable management. CE certified, hot-dip galvanized steel ensures long-term.

Key Takeaways

100mm low-voltage cable trays typically range from $20 to $50 per 2–3 meter section, depending on type, material, and supplier.

Types and Materials

Ladder Cable Trays: Hot-dip galvanized steel, ideal for heavy-duty support and ventilation, commonly used in industrial and commercial installations. Perforated Cable Trays: Provide excellent airflow to prevent heat buildup, suitable for electrical systems where heat dissipation is critical. Wire Mesh Cable Trays: Lightweight, strong, and flexible, perfect for data and communication wiring.

Channel Cable Trays: Narrow U-shaped trays for single cable runs in tight spaces. Materials include galvanized steel, electro-galvanized steel, aluminum, and stainless steel, offering corrosion resistance and long-term durability.

Pricing Estimates

Standard 2. 4–3 meter lengths: Prices generally range from $20 to $50 per section, depending on material and type. Heavy-duty or custom lengths: Bulk orders or special cut lengths may increase the price; suppliers often provide trade pricing for large quantities.

Fittings and accessories: Additional costs apply per unit for bends, tees, and connectors.

Additional Considerations

Ventilation and heat management: Perforated or mesh designs help prevent overheating of low-voltage cables. Installation flexibility: Many trays allow bending without cutting, making them adaptable to complex layouts. Delivery: Standard orders are usually dispatched within 1–2 working days, but bulk or custom orders may take longer.

For an accurate quote, it is recommended to contact suppliers directly with your required length, material, and quantity. Suppliers like Alibaba, DirectChannel UK, Bahra Electric, and CableTrayFab provide both standard and customizable 100mm cable trays suitable for low-voltage applications.
