Price quote for 2-core fiber optic splice

Overview

Fiber Optic Splicing Cost Per Splice (2025 Guide), SpliceListFor most commercial projects, expect to pay $50–$150 per fusion splice point - but that number.

Key Takeaways

The estimated cost for a 2-core fiber optic fusion splice ranges from $100 to $300, depending on labor, equipment, and site conditions. Cost BreakdownPer-Splice Labor: Fusion splicing is the most common method for permanent fiber connections. Labor costs typically range from $50 to $150 per splice for standard single-mode fibers, which includes the actual splicing and OTDR verification of each joint.

For a 2-core cable, this would mean 2 splice points, so the base labor cost would be approximately $100–$300. Equipment and Tools: Fusion splicing requires specialized equipment such as a fusion splicer ($3,000–$15,000), a precision cleaver ($500–$2,000), and an OTDR ($5,000–$20,000) for testing. These costs are typically included in contractor service fees rather than charged separately for small jobs.

Mobilization and Travel: Contractors may charge a mobilization fee ranging from $150–$500 for local work, which covers travel, setup, and fuel. Remote or difficult-to-access sites can increase this cost. Additional Considerations: Fiber Type: Standard OS2 single-mode fiber is straightforward, but specialty fibers or ribbon fibers may increase costs.

Site Conditions: Aerial splicing is cheaper than underground vault work, which may require traffic control or confined space entry. Mechanical Splicing Alternative: Mechanical splicing is cheaper upfront but less reliable long-term, generally used for temporary repairs. Example Estimate for a 2-Core Fusion SpliceItemCost RangeLabor for 2 splices$100–$300Mobilization (local)$150–$500Total Estimated Cost$250–$800This estimate assumes standard single-mode fiber, easy site access, and local service.

Costs may vary based on location, fiber type, and contractor pricing. For precise pricing, it is recommended to request a formal quote from a local fiber splicing contractor who can assess site conditions and provide a fixed unit cost.

Fiber Optic Splicing Cost Per Splice (2025 Guide), SpliceList

For most commercial projects, expect to pay $50–$150 per fusion splice point - but that number can swing in either direction based on the factors below. The "per splice" rate is the most common pricing

How much should I get paid per splice? : r/FiberOptics

I usually bill T&M, but it works out to about $175-250 for setup/teardown per site and $4-7 per fiber for prep in a new tray in an existing case and splicing depending on if it''s flooded or dry cable.

Fiber Optic Splicing

Fiber Optic Center has fiber optic splicing equipment, including splicers, cleavers, protection sleeves, mechanical splicing tools and more. We distribute fiber optic splicing equipment from Corning, AFL,

How much does it cost to splice fiber?

The cost of splicing fiber optic cables can vary significantly based on several factors, including the type of splice, the equipment used, the location of the job, and the

Fusion splicer,Fiber optic splicer,Factory Price

The Fibmax Fi-6 is an entry-level fusion splicer designed for fiber optic technicians who need reliable cladding alignment performance at a competitive price point.

Fusion Splicing Services

We use Fujikura, Sumitomo, and Precision Rated Optics fusion splicing equipment, as well as, EXFO and Viavi OTDR''s and OLTS equipment to provide you with complete, documented results.
