Relay Protection Tester onlly

Overview

The ONLLY Relay Protection Tester ONLLY-AT1266-40AH is an advanced and highly reliable testing device specifically designed for testing relay protection systems in electrical networks, substations, and power plants. Guangdong ONLLY Electrical Automation Co., founded in 1994, is a professional manufacturer specializing in the research, development, production and sales of testing equipment for power system. Safeguard lives, equipment, and continuity of power by ensuring your protection relays operate correctly. Because of the built-in control panel. The system is battery powered (lasts 8 hours standard use), and allows the operator to perform tests on both instantaneous and timer relays. Efficiently determine correct relay functionality including minimum.
