Remote power-off distribution box switch

Overview

Remote emergency power off (REPO) rack PDUs enable immediate and complete power off control from one button. These PDUs are hardwired and the power off switch can be housed anywhere in the data center for quick and easy access, should the need for immediate shutdown arise. Designed to remotely operate the building's shunt switch, the Knox Remote Power Box supports electrical power disconnect for not only buildings, but also equipment and systems such as. Raritan intelligent PDUs (iPDUs) allow you to control the power of a single PDU or a group of PDUs, down to the individual outlets. Instead, you can manually or programmatically power your intelligent PDUs on or off. If the power supply to one of the inputs fails or deteriorates, the device automatically switches consumers to the other. The Remote Power Switch - the first DC PDU (Power Distribution Unit) from DPS Telecom - allows you to switch on/off and reboot your gear from miles away. Switch 12V, 24V, or 48V devices on a single unit.
