Samoa Outdoor Distribution Box Types

Overview

Samoa Landscape Environmentally Friendly Box-type SubstationThe landscape and environmentally friendly box-type substation has a high voltage rated voltage.

Key Takeaways

Samoa offers a variety of outdoor distribution boxes, including landscape-friendly substations, explosion-proof boxes, and cable distribution boxes, each designed for specific voltage, environmental, and safety requirements. 1.

Landscape and Environmentally Friendly Box-

Type Substations

These outdoor boxes are designed for 10kV high voltage and 0. 4kV low voltage systems, suitable for urban or landscaped areas. Key features include: Construction: Fiberglass reinforced concrete shell with cold-rolled steel panels, doors, and partitions, providing strong mechanical strength and long-term insulation.

Transformer Capacity: Options from 50 kVA up to 630 kVA. Environmental Tolerance: Can withstand pressures up to 20 tons, altitudes ≤1000m, temperatures from -25°C to 40°C, relative humidity ≤90%, wind speeds ≤34 m/s, and ice thickness ≤20mm. Protection Level: IP23D, suitable for outdoor use in areas free from fire, explosion, or severe chemical pollution.

Maintenance: Compact design allows easy access and maintenance. 2.

Explosion-

Proof Distribution Boxes

These boxes are designed for hazardous environments such as chemical plants, coal mines, and wineries. Key characteristics include: Protection: IP65 for outdoor use, explosion-proof standard EXdIIBT4, waterproof, anti-dust, and shock-proof. Construction: 4.

0 mm thick steel plate with seamless welding and surface spray for durability. Applications: Suitable for DC to AC conversion, single-phase to three-phase systems, and high-voltage to low-voltage distribution. Customization: Can be tailored for specific voltage levels, cable terminations, and environmental conditions.

Additional Features: Low noise operation, spark-proof, and capable of handling various loads including motors, lamps, and precision equipment. 3.

Cable Distribution Boxes

These are compact, tamper-resistant, and weatherproof units for medium voltage outdoor or underground networks. Features include: Function: Provide branching and connection points for multiple cable circuits, with built-in fault interrupters, vacuum switches, and fuse options. Weather Resistance: Fully sealed to resist rain, dust, and harsh environmental conditions.

Customization: Voltage ratings, connector types, and enclosure materials can be adapted to project requirements. Installation: Pre-engineered for easy installation and operation, suitable for utility and industrial zones.

Summary

In Samoa, outdoor distribution boxes are available in three main types: Landscape/environmentally friendly substations for urban and outdoor installations with moderate protection and transformer capacity. Explosion-proof boxes for hazardous or industrial environments requiring high safety and IP65 protection. Cable distribution boxes for medium voltage networks, offering compact, weatherproof, and customizable solutions.

These options allow utilities and industries to select boxes based on voltage requirements, environmental conditions, safety standards, and installation needs.
