

Samoa sells large quantities of fiber optic cables

Overview

Samoa Fiber Optical Cable and Cable Assembly Products Market Samoa Fiber Optical Cable and Cable Assembly Products Market is expected to grow during 2025-2.

Key Takeaways

The primary company providing fiber optic cable infrastructure in Samoa is the Samoa Submarine Cable Company (SSCC), a public-private partnership delivering wholesale fiber optic capacity. Samoa Submarine Cable Company (SSCC)SSCC is the leading provider of fiber optic cable infrastructure in Samoa, established in 2016 to enhance regional connectivity and digital services. The company operates major submarine cable systems, including the Tui-Samoa and Manatua cables, connecting Samoa to Fiji, Wallis and Futuna, and other Pacific locations.

SSC

C focuses on supplying raw wholesale capacity to telecommunications operators rather than selling services directly to end-users, enabling ISPs and other providers to deliver internet services across Samoa. Services and CapabilitiesHigh-speed, reliable, and affordable internet connectivity via state-of-the-art fiber optic technology. Wholesale capacity for licensed service providers, regulated to ensure equitable access and cost-based pricing.

Support for IC

T innovation, economic growth, and regional integration through robust digital infrastructure. Ownership and PartnershipsSSCC operates as a public-private partnership, with stakeholders including the Samoa National Provident Fund, Samoa Life Assurance Corp, Unit Trust of Samoa, Computer Services Ltd., Vodafone Samoa, and Digicel Samoa. The government is actively moving to acquire full ownership of SSCC shares previously held by ISPs, reflecting the strategic importance of fiber infrastructure.

Government Fiber Initiatives

In addition to SSCC, the Samoa National Broadband Highway (SNBH) is a government-managed network linking schools, hospitals, and government offices via fiber optic cables. Managed by Computer Services Ltd., SNBH complements SSCC's submarine cables by providing local connectivity and backhaul infrastructure. The Ministry of Communications and Information Technology (M.

C. I. T.) oversees upgrades and integration of SNBH with the broader fiber network.

International Connectivity

Samoa is also connected to international fiber networks through projects like the America Samoa Hawaii (ASH) Cable and the Samoa-American Samoa (SAS) Cable, which provide inter-island and global connectivity. These projects expand capacity and ensure Samoa's access to global telecommunications infrastructure.

Contact and Procurement

For businesses or ISPs interested in purchasing fiber optic capacity or collaborating on infrastructure projects, SSCC provides contact information and updates on their website, including details on upcoming conferences and partnership opportunities. In summary, SSCC is the main company selling and managing fiber optic cable capacity in Samoa, supported by government initiatives like SNBH and international submarine cable projects, making it the central hub for fiber optic connectivity in the region.
