Singapore Fire-Resistant Cable Tray Manufacturer

Overview

FRP Cable Trays Supplier in Singapore | FerrotechFerrotech's FRP Cable Trays offer high strength, corrosion resistance, fire safety, and customized solutio.

Key Takeaways

Leading manufacturers in Singapore for fire-retardant cable trays include Ferrotech, Foresight Metal Engineering, United U-Li Projects, Voltecx, and AEHUB, offering a range of FRP, metal, and customized solutions.

Key Manufacturers and Suppliers

Ferrotech specializes in FRP (Fiberglass Reinforced Plastic) cable trays that are fire-retardant and corrosion-resistant, ideal for chemical plants, refineries, and marine environments. Their trays are made from premium fire-retardant resins, reinforced with fiberglass, and meet stringent fire safety standards. Options include Isophthalic Polyester (IFR) and Vinyl Ester resins, providing high strength, non-conductivity, UV resistance, and good electrical insulation for critical infrastructure.

Foresight Metal Engineering Pte Ltd has been a leading specialist in metal cable trays, trunkings, and ladders since 1992. They offer high-quality products for commercial and industrial projects, including customized solutions.

Their FM

E brand is recognized for durability, compliance with industry standards, and suitability for sectors like pharmaceuticals, medical, commercial, and marine industries.

United U-

Li Projects Pte Ltd provides a comprehensive range of cable trays, trunkings, ladders, conduits, fittings, and floor trunking systems for diverse industrial projects. They focus on high-quality materials and assembly systems suitable for various applications in Singapore. Voltecx (Takaso Industries Singapore) offers premium cable trunkings, trays, ladders, conduits, and C-channels, emphasizing innovative solutions and superior construction performance.

They cater to diverse construction needs and provide tailored solutions for complex infrastructure projects.

AEHU

B supplies cable trays and ladders in stainless steel (SS304, SS316, SS316L), aluminium, galvanised steel, and FRP materials, certified to IEC 61537 and NEMA VE-1 standards. Their offerings include strut channels and other cable support systems suitable for fire-protection and industrial applications.

Considerations for Fire Protection Cable Trays

Material Choice: FRP trays are non-conductive and corrosion-resistant, while metal trays (stainless steel or galvanised) offer high mechanical strength. Fire Retardancy: Ensure trays meet local fire safety standards and ASTM or IEC certifications. Customization: Many manufacturers provide tailored solutions for load capacity, layout, and environmental conditions.

Applications: Suitable for industrial plants, commercial buildings, marine environments, and areas with high fire risk. These manufacturers provide a range of fire-protection cable tray solutions in Singapore, combining safety, durability, and compliance for critical electrical infrastructure.
