Steps and Price for Moving a Distribution Box

Overview

How to Relocate Your Electrical Panel: Steps & CostsA detailed guide on electrical panel relocation: step-by-step process, cost factors, legal requirements.

Key Takeaways

Relocating a distribution box typically costs between $500 and $4,000, depending on panel type, distance, and labor requirements.

Typical Cost Ranges

Fuse Box: $500 to $1,500 for relocation, as it is simpler and requires less labor. Breaker Box: $1,500 to $4,000, due to complexity and the need to reroute multiple circuits. Subpanel: $1,000 to $3,000, depending on size and location.

Factors Affecting Cost

Distance and Accessibility: Longer wiring runs or moving the panel to a hard-to-reach area increases labor and material costs. Labor Rates: Electricians typically charge $70 to $150 per hour, and relocation can take 8 to 24 hours depending on complexity. Panel Type: Circuit breaker boxes are more intricate than fuse boxes, requiring more time and materials.

Permits and Inspections: Most relocations require permits, which vary by state or municipality and can add to the total cost. Additional Materials: Extra wiring, junction boxes, and connectors may be needed, costing $10–$15 per connection and $0. 50–$1 per foot of wire.

Wall Repairs and Finishing: Drywall repair and painting after relocation can add $300–$950 to the total cost.

Summary

For budgeting purposes, homeowners should expect $500–$1,500 for a simple fuse box, $1,500–$4,000 for a breaker box, and $1,000–$3,000 for a subpanel. Costs vary based on distance, labor, panel type, and local permit requirements. Obtaining quotes from licensed electricians is recommended to get an accurate estimate tailored to your specific project.
