

Syria-Bissau-Lithuania Fiber Optic Cable Upgrade

Overview

The scheme will see STC Group acquire a 75 percent stake in the project for three billion SAR (\$800 million), which aims to build a 4,500 km (2,796 mile) fiber-optic cable network, as well as several data centers and submarine cable landing stations in Syria. It is intended to connect Syrian cities and position Syria as a digital corridor between Asia and Europe, with submarine landing stations in Tartus and inland data. Passive/Active Infrastructure Deployment and Operation for Syria's National Fiber-to-the-Premises Broadband Network Navigate through the complete RFI document with our interactive page turner. Experience the full document content with realistic page turning animations. The BARQ NET FTTP initiative. Syria's Ministry of Communications and Information Technology announced the launch of "BarqNet" on Sunday, a nationwide initiative to expand fiber-optic internet access directly to homes and businesses. The project, described by the government as a cornerstone of its digital infrastructure. The Silklink project involves an investment exceeding SAR3 billion (around \$800 million) and is designed to fortify telecommunications infrastructure. By establishing a fiber-optic network stretching over 4,500 kilometers, the project will link Syria both regionally and internationally. The SilkLink project was launched by Syria in May 2025 to modernize its war-torn. Five major regional Internet companies are bidding for Syria's \$400-\$500 million SilkLink overland data cable project Reuters/Amit Dave Syria is expected to award a national fiber optic network contract next month, following final bid submissions from regional telecom companies.
