

Syria Rack-Mounted Type

Overview

- M-63 Plamen – Original towed 32-tube 128 mm multiple rocket launcher. Uses Plamen-A and Plamen-B rockets (with a range of 8,600 m).
- M-94 Plamen-S – Launcher mounted on a TAM 6x6 truck chassis for greater tactical mobility and allowing it to, increasing survivability. In addition to 32 rockets in the ready-to-launch position, the Plamen-S also carries a rack with 16 rockets. The syst.

Key Takeaways

Syria rack-mounted systems include modular UPS units and smart lithium battery racks designed for server rooms, data centers, and mission-critical applications.

Modular UPS Systems

The Syria RM Series Rack-

Mounted Modular UPS is a flexible uninterruptible power supply system suitable for small and medium server rooms. Key features include: Power Modules: Configurable with up to 6 modules, providing a maximum of 20kVA. Battery Groups: Supports 5 groups of battery modules with optional 10A charging modules.

Compatibility: Fits all standard 19" server cabinets without derating, allowing single-phase input and output configurations. Applications: Ideal for modular, tower, or rack-mounted setups in data centers or IT infrastructure projects.

Smart Lithium Battery Racks

The Syria Smart Lithium Battery Rack offers scalable energy storage for structured installations: Capacity: 280Ah, 14.34 kWh per rack. Features: Smart monitoring, enhanced system protection, and modular scalability.

Warranty: 5 years, suitable for integration with rack-mounted UPS or server systems.

Military and Rugged Rack Considerations

For military or harsh-environment applications, rack-mounted systems may include: Ruggedized Construction: Reinforced chassis, shock-mounted components, and extended temperature operation. Cooling and Ventilation: Filtered or sealed cooling systems to handle extreme heat. Compliance: MIL-STD-810H, IP/NEMA ratings for dust and water protection, EMI/RFI shielding, and corrosion-resistant coatings.

Customization: Heights from 36" to 76", with flexible depth and width for payload integration.

Summary

Syria rack-mounted types encompass modular UPS systems for power reliability, smart lithium battery racks for energy storage, and ruggedized enclosures for military or industrial use. Selection depends on the mission profile, environmental conditions, and integration requirements, whether for IT infrastructure, tactical deployments, or energy storage solutions. These systems are designed for flexibility, scalability, and reliability in both commercial and defense applications.
