TP Ring Network Fiber Optic Switch 2 Optical 4 Electrical

Overview

The TP-Link TL-FC324PAB-3 is a fully Gigabit, 2-port optical and 4-port electrical PoE ring fiber transceiver supporting the ERPS ring protocol for enhanced network reliability.

Key Takeaways

The TP-LINK TL-FC324PAB-3 is a fiber optic transceiver with 2 optical ports, 4 PoE-enabled electrical ports, and full support for ring network topologies.

Key Features

Ports: 2 optical fiber ports for high-speed backbone connectivity and 4 gigabit electrical ports with PoE support, allowing both data and power delivery over a single cable. Ring Network Compatibility: Designed for ring network topologies, supporting ERPS (Ethernet Ring Protection Switching) protocols to ensure fast failover and stable communication in case of link or switch failure.

High-

Speed Performance: Supports gigabit data transfer on both optical and electrical ports, suitable for mission-critical applications such as industrial automation, surveillance, and smart grid systems. Deployment Flexibility: PoE-enabled ports allow powering devices like IP cameras, access points, or VoIP phones directly from the switch, reducing the need for separate power sources. Reliability: Ring topology ensures redundant pathways, so if one fiber link fails, data can be rerouted in the opposite direction, minimizing downtime.

Practical Applications

Industrial Automation: Connects PLCs, sensors, and control systems in factories with high reliability. Video Surveillance: Powers and connects IP cameras while maintaining continuous network uptime. Campus or Facility Backbone: Provides a resilient backbone for large-scale networks with multiple nodes.

Smart Grid and Utility Networks: Ensures uninterrupted communication for monitoring and control systems.

Design Considerations

Ring Topology: Each switch connects to two other nodes, forming a closed loop. This allows bidirectional data flow and fast recovery from link failures.

Po

E Budget: Ensure the total power requirement of connected devices does not exceed the switch's PoE capacity. Network Management: While the TL-FC324PAB-3 is primarily a media converter, monitoring and management can be enhanced with compatible network management tools. The TP-LINK TL-FC324PAB-3 is ideal for environments requiring robust, high-speed, and redundant network connections with the added convenience of PoE for connected devices.

Product description SFP Ethernet Fiber Optic Switch, 1000m Ethernet Fiber Optic Transceiver, 4 Optical Ports 2 Electrical Ports, 120km, with LED

Single-mode optical fiber

In fiber-optic communication, a single-mode optical fiber, also known as fundamental- or mono-mode, is an optical fiber designed to carry only a single mode of light - the transverse mode.
