

UAE Galvanized Cable Tray Cost Table

Overview

Cable tray pricing in UAE depends on several important factors including material type, tray dimensions, coating finish, load capacity, project environment, and installation requirements.

Key Takeaways

Galvanized cable trays in the UAE typically range from AED 150 to AED 400 per 3-meter section, depending on size, thickness, and supplier.

Price Overview

The cost of galvanized cable trays varies based on tray dimensions, material thickness, and load capacity. For example, a 100mm x 50mm GI cable tray can cost around AED 150-200 per 3-meter length, while larger trays such as 600mm x 50mm may be priced higher due to increased material usage and industrial load capacity. Suppliers like FEPY, BINJA, and Gooxoom offer a range of galvanized iron (GI) trays suitable for both indoor and outdoor applications.

Factors Affecting Cost

Material Type: Galvanized iron (GI) is cost-effective and corrosion-resistant, while HDG or stainless steel trays are more expensive due to superior durability. **Tray Size and Thickness:** Wider and thicker trays designed for heavy-duty industrial use cost more. **Coating and Finish:** Galvanization adds corrosion resistance, which slightly increases the price but ensures longevity in harsh environments.

Project Requirements: Custom lengths, perforated designs for ventilation, and installation complexity can influence overall cost. Supplier Options FEPY: Offers GI trays in various sizes, including 600mm x 50mm x 3m, with fast delivery across the UAE.

BINJ

A: Supplies 100mm x 50mm x 3m GI trays with free delivery and support for MEP contractors and facility management companies. Gooxoom: Provides a wide range of galvanized cable trays with perforated options for ventilation and industrial applications.

Practical Considerations

When budgeting, consider installation costs, potential customization, and delivery fees. Galvanized trays are suitable for industrial, commercial, and outdoor environments, offering durability and corrosion resistance, which can reduce long-term maintenance costs. In summary, expect to pay between AED 150 and AED 400 per 3-meter galvanized cable tray in the UAE, with the final price depending on size, thickness, and supplier choice.
