UPS Mobile Emergency Power Supply System

Overview

Our mobile UPS systems (Uninterruptible Power Supply) ensure dependable energy for critical applications. Modular and scalable – ideal for industrial, IT, and emergency power solutions. It is a reliable partner in emergencies, but is also perfect for temporary construction and assembly sites as well as operations in remote areas. A UPS is different from an auxiliary or back-up power system in that it provides almost instantaneous protection against power interruptions by supplying energy stored in. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteries, supercapacitors, or flywheels.
