Vertical Cable Trays in Ireland

Overview

Cable Tray Browse our durable cable trays designed for efficient cable management in domestic and industrial settings. Ensure safety and organization with.

Key Takeaways

Vertical cable trays in Ireland are available from multiple suppliers, designed to organize and support cables in data cabinets, industrial, and commercial installations.

Overview

Vertical cable trays are specialized cable management systems used to route and support electrical, data, and communication cables in a vertical orientation, often within or alongside data cabinets and racks. They help maintain organization, improve airflow, and allow easy access for maintenance or modifications. Vertical trays are particularly useful in data centers, IT rooms, and industrial facilities where space optimization and cable separation are critical.

Types and FeaturesRackyRax Vertical Cable Trays: These trays are 150mm deep and available in sizes such as 18U, 27U, and 39U, making them suitable for standard server racks and cabinets. Material Options: Typically made from steel or aluminum, providing durability and protection against physical damage and environmental factors. Design Variants: Include ladder-style, wire mesh, and single rail options, each offering different levels of support, airflow, and ease of cable access.
