What are the platforms that sell cybersecurity equipment called

Overview

11 Best Cybersecurity Platforms You Should Know About [2026]In this article, you'll learn about 11 of the best cybersecurity platforms currently available.

Key Takeaways

Leading companies that sell cybersecurity equipment include Palo Alto Networks, Checkpoint Software, Fortinet, Cisco, Kaspersky, and emerging startups like ARMIS and Saviynt.

Established Cybersecurity Vendors

Palo Alto Networks: Offers next-generation firewalls, endpoint protection, cloud security, threat intelligence, and AI-based continuous security platforms, suitable for large enterprises and growing businesses. Checkpoint Software: Provides firewalls, intrusion prevention systems, endpoint security, and mobile threat prevention, with centralized management and scalable solutions. Fortinet: Known for its Security Fabric platform, integrating identity, firewall, analytics, and automation into a single control plane for enterprise-scale protection.

Cisco Secure

X: Offers integrated network security, identity management, and analytics solutions for high-throughput environments. Kaspersky: Specializes in antivirus and cybersecurity software for PCs, servers, mobile devices, and industrial control systems, recognized for strong malware detection. Cloudflare: Provides website security, application security, zero-trust solutions, and AI-based threat mitigation.

Microsoft Security: Delivers cloud and enterprise security platforms with SIEM/SOAR integrations and real-time threat intelligence. Emerging Cybersecurity StartupsARMIS: Focuses on asset visibility and security for connected devices, leading in funding and growth among 2026 startups. Saviynt: Specializes in identity governance and cloud security solutions.

Upwind Security: Provides innovative cybersecurity tools for enterprise protection. Other notable startups include Hunters.ai and various Seedtable-ranked companies that are rapidly scaling in network security, endpoint defense, and AI-driven protection.

Retail and Specialty Suppliers

Hacker Warehouse: Offers a wide range of cybersecurity tools and equipment for penetration testers, red teamers, and researchers, sourcing products from major technology distributors.

Summary

Organizations seeking cybersecurity equipment can choose from large multinational vendors offering comprehensive enterprise solutions, innovative startups providing specialized or emerging technologies, and retail suppliers catering to professional and hobbyist security practitioners. The choice depends on factors like scale, budget, deployment complexity, and specific security needs.
