

# Where is the Huijue headlight dimmer module located

## Overview

First, you'll need to disconnect the negative terminal of the battery and then locate the headlight control switch.

## Key Takeaways

The Huijue headlight dimmer module is typically located on the steering column or behind the dashboard within easy reach of the driver.

## Typical Locations

The headlight dimmer module, which controls switching between high and low beams, is usually found in one of the following areas: Steering Column: Often integrated with the multifunction switch or headlight switch assembly, allowing the driver to toggle high and low beams easily. Dashboard Area: Behind the dash, sometimes under the knee airbag or near the driver's side footwell, accessible by removing panels. Engine Bay (less common): Near the headlight assembly or within the under-hood fuse/relay box, especially in vehicles with advanced lighting controls.

## How It Works

The dimmer module receives input from the dimmer switch (pedal, stalk, or button) and sends electrical signals to the headlight circuit, adjusting voltage to switch between high and low beams. In modern vehicles, it may also be integrated with the body control module or electronic headlamp control system.

## Tips for Locating

Check the steering column first, as most Huijue models place the dimmer module there for easy access. Remove panels under the dashboard if it is not immediately visible. Consult the vehicle's service manual for exact diagrams, as placement can vary by model year and trim.

Ensure the battery is disconnected before attempting to access or replace the module to avoid electrical hazards. By following these guidelines, you should be able to locate the Huijue headlight dimmer module for inspection, repair, or replacement.

## Article Content

Where is the headlamp control module located?

The headlamp control module is not in the same place for every car. Common spots include the engine bay near the headlights, under-hood fuse boxes, and inside the cabin behind the dash or glove
